Product Details

Dunnage Air Bag / Packing Air Bag

Superior dunnage bags, manufactured by Pratibha Enterprises

Dunnage bags are specifically designed to secure and stabilize cargo in containers, closed rail cars, trucks and ships. They prevent both lateral and longitudinal movement and are much more effective in stabilizing cargo compared with wood blocking and bracing.

The best bag for a particular need depends on a number of variables such as void size, height of the cargo and specific shipping requirements. Our bags are available in a wide variety of sizes. Pratibha enterprises will advise on the most effective dunnage bag to match a customer's individual requirements.

Product Details

Dunnage Air Gun

We are a leading company specializing in the business of manufacturing and supplying Air Inflator Gun. This gun is a fast filling inflator tool designed for use with vinyl air bags and also for use with the polywoven air bags. This tool quickly fills the bags while conserving the use of air from your air compressor. We manufacture this tool at our sound production unit using high quality materials and components. Once the dunnage air bags reaches a certain level of air pressure, Air Inflator Gun kicks in to pop off the bag with just the right amount of air.

Features:

- Easy to use
 - Sturdy and durable
 - Noise free performance
-

Strapping Tensioner Tools / Manual Tensioner Tools / Heavy Duty Tensioner Tools

Pratibha Enterprises **MANUAL STRAPPING AND LASHING TOOLS** Manual Tensioners allow you to apply tension to your cargo securing system in an easy, fast and ergonomic way. Pratibha Enterprises manual tools are composed of a high quality steel body fitted with hardened steel parts.

Product Details

Manual Tensioners allow you to apply tension to your cargo securing system in an easy, fast and ergonomic way. **PRATIBHA ENTERPRISES** manual tools are composed of a high quality steel body fitted with hardened steel parts.

TOPACK manual strapping and lashing tools have many advantages over tools for conventional cargo securing materials. Manual tools used for steel strapping have a high degree of wear & tear due to the continuous steel on steel contact. Battery operated tools for plastic strapping are often expensive and extremely damage sensitive in industrial environments.

PRATIBHA ENTERPRISES manual tensioners can be used with both our **TOPACK Strapping** and **PRATIBHA ENTERPRISES Lashing** range of products.

Product Details

Ratchet Belt / CARGO Lashing Belt
